# ABOUT US

ETEM TANISKAN (SCHOOL PRINCIPAL)

The Light International School System (LISS) was established in 2006. LISS is operated as a non-governmental and non-political institution. Our school is dedicated to providing a well-rounded program of activities; directed towards the development of skills, talents, and self-confidence of each child. LISS is committed to educating students from diverse cultures to achieve academic excellence.

## OUR MISSION & VISION

Our mission is to prepare our students for leadership roles and provide them with opportunities to successful, responsible citizens, productive employees, and effective community members.

We also aim at cultivating generations who are able to speak English, which is most commonly used language in the world. Additionally, we prepare our youth to become skilled in their specialized fields, with advanced invention capabilities, honesty, morally upright, thus possessing religious and human values. The youth, equipped with the appropriate knowledge and skills, will be proud representatives of the countries in international competitions, in areas of Science, Arts, Sports, Olympia, etc

At the Light International School System, we also focus on each student's social and emotional development. Our program allows each child to build skills to cope with challenges and successes as well as creating a positive school environment.

## EXTRA CURRICULAR ACTIVITIES

# LIGHT INTERNATIONAL SCHOOL SYSTEM

PRE-PRIMARY, PRIMARY, JUNIOR & SENIOR HIGH SCHOOL

*for a brighter future*

## FACILITIES & LABORATORIES

### CONFERENCE ROOM

We have 65 sits available for students and the guests. There is a projector and P.A system to display high quality videos and documentaries.

### LIBRARY

In our Library we have books from very various topics. Some of these are: Science, History, Culture, Language, Math, Geography, etc.

### COMPUTER LAB

We provide laptop to all of our students to perform their projects and tasks. We also have smart-board with projector and A/C in the computer lab.

### SCIENCE LAB

Our Lab is equipped with modern tools and accessories. There is a microscope, skeletal system model, eye structure model and many more.

### PLAYGROUNDS

We have a children playground, football field, and basketball court for our students to refresh themselves after classes.
